

MINI Weight Care 30™

For overweight small breed dogs from 11 months to 8 years of age.

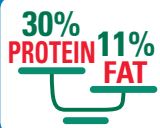

L-Carnitine – Burns Fat

It is important to keep your small breed dog at an ideal weight to ensure optimal health for as long as possible. A high level of L-carnitine (150 mg/kg), 3 times more the level than MINI Adult 27™, helps burn fat stored in the body and maintain a healthy weight for your small breed dog.

• 312 kcal/cup
Cost per day: \$0.94*

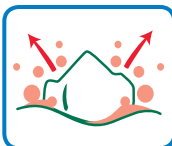

*Average MINI dog, 12 lb bag

Maintains Muscle Mass

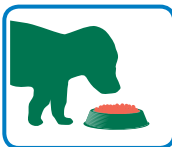

A small breed dog needs food rich in proteins to prevent excess weight gain, or to return to an ideal weight, while preserving muscle mass.

High protein (30%), reduced fat (11%), lower starch levels and oatmeal help to burn energy slower over time, keeping your small breed dog feeling fuller for longer.

Reduces Tartar

Sodium tripolyphosphate, decaffeinated green tea polyphenols and adapted kibble size, shape, texture & density effectively "brush" the teeth to help prevent the formation of plaque and tartar.

Enhanced Palatability

Some small breed dogs may not enjoy and even sometimes refuse to eat their food. A combination of exclusive natural flavours and aromas of the highest quality helps ensure that your small breed dog will enjoy mealtime every day.

Recommended feeding portions (cups per day)

Weight in lbs	Overweight	Normal
2 lbs	1/4 cup	1/3 cup
4 lbs	1/3 cup	1/2 cup
6 lbs	1/2 cup	2/3 cup
8 lbs	3/4 cup	1 cup
10 lbs	3/4 cup	1 cup
12 lbs	1 cup	1 1/4 cups
14 lbs	1 cup	1 1/4 cups
16 lbs	1 1/4 cups	1 1/2 cups
18 lbs	1 1/4 cups	1 1/2 cups
20 lbs	1 1/4 cups	1 2/3 cups

1 Cup = 8 Fluid Ounces = 92 Grams

Guaranteed Analysis
